Summary of U.S. Export and Import Merchandise Trade

SEPTEMBER 1978

FT 900-78-9

For wire transmission 3:30 P.M., Thursday, October 26, 1978

Seasonally Adjusted and Unadjusted Data

(Including unadjusted data on imports of petroleum and petroleum products)

UNIV. OF FL LIB. DOCUMENTS DEPT.
JAN 12 1979
U.S. DEPOSITORY

F.A.S. EXPORTS AND F.A.S. IMPORTS

Seasonally Adjusted

The Bureau of the Census, Department of Commerce announced today that during September 1978, exports on a f.a.s. (free alongside ship) U.S. port of exportation value basis, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments, amounted to $13,428.9 million and that general imports on a f.a.s. foreign port of exportation value basis, amounted to $15,120.0 million.[1 2 3]

Based on the above export and import figures, the September merchandise trade balance was in deficit by $1,691.1 million, as compared to the deficit of $1,620.9 million recorded in August.[1 2 3]

During the first 9-months of 1978 (January-September), exports on a seasonally adjusted basis were at an annual rate of $138,738 million, a level about 15 percent higher than the calendar year 1977 total of $121,150 million. Imports for the January-September 1978 period were at an annual rate of $168,961 million, an increase of about 14 percent over the calendar year 1977 total of $147,685 million.

For the 4-month period, June-September 1978, exports averaged $12,454.1 million per month, about 13 percent higher than the $11,055.8 million average reported for the preceding 4-month period February-May 1978. Imports on a f.a.s. value basis, averaged $14,428.1 million per month for the current 4-month period, a level about 2 percent higher than the $14,156.9 million average reported for the preceding 4-month period.[1 2 3]

Unadjusted

Exports, excluding Military Assistance Program Grant-Aid shipments, increased from $11,613.9 million in August to $12,713.1 million in September. With Military Assistance Program Grant-Aid shipments included, exports increased from $11,621.8 million in August to $12,714.4 million in September. General imports increased from $14,024.0 million in August to $14,416.9 million in September.

Note: Footnotes 1, 2, and 3 are shown at the bottom of page 4.

F.A.S. EXPORTS AND C.I.F. IMPORTS

Seasonally Adjusted

The Bureau of the Census, Department of Commerce announced today that during September 1978, exports on a f.a.s. (free alongside ship) U.S. port of exportation value basis, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments, amounted to $13,428.9 million and that general imports on a c.i.f. (cost, insurance, and freight) U.S. port of entry value basis, amounted to $16,143.7 million.[1 2 3]

Based on the above export and import figures, the September merchandise trade balance was in deficit by $2,714.8 million, as compared to the deficit of $2,560.7 million recorded in August.[1 2 3]

During the first 9-months of 1978 (January-September), exports on a seasonally adjusted basis were at an annual rate of $138,738 million, a level about 15 percent higher than the calendar year 1977 total of $121,150 million. Imports for the January-September 1978 period were at an annual rate of $179,956 million, an increase of about 14 percent over the calendar year 1977 total of $157,560 million.

For the 4-month period, June-September 1978, exports averaged $12,454.1 million per month, about 13 percent higher than the $11,055.8 million average reported for the preceding 4-month period, February-May 1978. Imports on a c.i.f. value basis, averaged $15,382.3 million per month for the current 4-month period, a level about 2 percent higher than the $15,070.2 million average reported for the preceding 4-month period.[1 2 3]

Unadjusted

Exports, excluding Military Assistance Program Grant-Aid shipments, increased from $11,613.9 million in August to $12,713.1 million in September. With Military Assistance Program Grant-Aid shipments included, exports increased from $11,621.8 million in August to $12,714.4 million in September. General imports increased from $14,959.4 million in August to $15,393.0 million in September.

U.S. Department of Commerce
BUREAU OF THE CENSUS

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140; 763-7754; and 763-7755.

For sale by the Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by a draft on a U.S. bank. Price 30 cents per copy. Annual subscription (FT 900, 975, 985, and 986 combined) $14.90.

EXPLANATION OF STATISTICS

IMPORT STATISTICS

Coverage

The U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into the U.S. Customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. The U.S. import statistics exclude imports into the Virgin Islands, Guam, American Samoa, and other U.S. possessions; and shipments between the United States and Puerto Rico, between the United States and U.S. possessions, and between any of these outlying areas. (Data on U.S. trade with Puerto Rico and the Virgin Islands of the United States are published separately in Report FT 800. Additional data on such trade and on imports into the Virgin Islands from foreign countries are presented in reference tabulations.) Data on imports of petroleum and selected petroleum products, including shipments into the Virgin Islands from foreign countries, are included in this report effective with the January 1976 statistics (previously shown in former Report FT 900-Supplement).

The U.S. import statistics also exclude American goods returned to the United States by its Armed Forces; intransit shipments through the United States when documented as such with Customs; temporary shipments; transactions not considered to be of statistical significance, such as shipments of personal and household effects; low-valued nondutiable imports by mail; and issued monetary coins of all component metals.

Inclusion of Gold in the Statistics

Effective with the statistics for January 1978, imports of nonmonetary gold (in such forms as ore, scrap and base bullion, nonmonetary refined bullion, etc.) which were previously excluded, are now included in the statistics. Imports of silver in these forms have been included since January 1969. Additional information regarding the inclusion of gold in the 1978 statistics appears in the November and December 1977 issues of Report FT 990.

General Imports/Imports For Consumption

The statistics on U.S. imports are presented in terms of both "General Imports" and "Imports for Consumption." General imports are a combination of entries for immediate consumption and entries into Customs bonded warehouses, and thus generally reflect total arrivals of merchandise. Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption, and thus generally reflect the total of the commodities entered into U.S. consumption channels.

Source Of Import Information

The official U.S. import statistics are compiled by the Bureau of the Census from copies of the import entry and warehouse withdrawal forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over $250, which are ordinarily subject to examination for Customs appraisement purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

Import Valuation

F.a.s. Import Value.—The f.a.s. (free alongside ship) value represents the transaction value of imports at the foreign port of exportation. It is based on the purchase price, i.e., the actual transaction value and generally includes all charges incurred in placing the merchandise alongside the carrier at the port of exportation in the country of exportation.

C.i.f. Import Value.—The c.i.f. (cost, insurance, and freight) value represents the value of imports at the first port of entry in the United States. It is based on the purchase price and includes all freight, insurance, and other charges (excluding U.S. import duties) incurred in bringing the merchandise from the country of exportation and generally placing it alongside the carrier at the first port of entry in the United States. If the merchandise was acquired in a transaction between related parties, the purchase price used in deriving the c.i.f. value is based on an arm's-length equivalent transaction price, i.e., a price which would exist between unrelated buyers and sellers.

Import Commodity Information

Import data are initially reported in terms of the commodity classifications in the Tariff Schedules of the United States Annotated (TSUSA), which is an official publication of the U.S. International Trade Commission, embracing the legal text of the Tariff Schedules of the United States together with statistical annotations. The TSUSA data are rearranged and presented in this report in terms of totals for the 1-digit commodity sections in Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based upon the Standard International Trade Classification (SITC), Revision 2, effective with the statistics for January 1978. Prior to January 1978, Schedule A was based upon the former SITC, Revised.

Date of Importation and Import Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation (or the month of withdrawal in the case of warehouse withdrawals for consumption). Effective with the January 1978 statistics, the date of importation as reported on the import entries is being used to determine the statistical month in which the shipments are included. However, since under the Customs "immediate-delivery" procedures importers may file the import entry up to 10 workdays after the date of release of the merchandise, some documents for merchandise imported during the last few days of a given month may not be received in time for inclusion in the statistics for that month. As a result, there is a carryover, estimated at about 15 percent, from the actual month of importation to a subsequent month. In addition, processing problems (e.g., late filing of documents, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.) contribute to an additional carryover of about 5 percent (in terms of value) of shipments from the re-

ported month of importation (or withdrawal from warehouse) to a subsequent month, usually the succeeding month. These limitations should be borne in mind when making month-to-month comparisons.

For 1977 and previous years, the date of Customs official acceptance of the import documents was used to determine the statistical month in which the shipments were included. However, in certain annual publications for 1977 and in 1978 reports which also present 1977 data (e.g., FT 900, FT 990, etc.), the 1977 data are recompiled on a date of importation basis.

Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in imports, exports, and similar series often reflect primarily irregular movements, e.g., exogenous events such as strikes, differences in monthly carryover, etc.

Estimated Data for Imports Valued Under $251

The overall import and Schedule A Section 9 totals include sample estimates for shipments valued under $251. Therefore, they are subject to sampling error, estimated at less than one-tenth of one percent for the unadjusted overall total and about one percent for the unadjusted Schedule A Section 9 total. This means that we can have about 67 percent confidence that the published unadjusted overall totals and the unadjusted Schedule A Section 9 totals differ by less than one-tenth of a percent and one percent, respectively, from the totals that would have resulted from a complete tabulation. The statistics on imports of petroleum and petroleum products included in this report reflect fully compiled data and, therefore, are not subject to sampling error.

EXPORT STATISTICS

Coverage

The export statistics reflect, in general, both government and nongovernment exports of domestic and foreign merchandise from the U.S. Customs territory (includes the 50 States, the District of Columbia, and Puerto Rico) to foreign countries, whether the exportation involves a commercial transaction or not. The statistics, therefore, include Department of Defense Military Assistance Program Grant-Aid shipments, shipments for economic assistance under the Foreign Assistance Act and shipments of agricultural commodities under P.L. 480 (The Agricultural Trade Development and Assistance Act of 1954, as amended) and related laws. The following are excluded from the statistics: Shipments to U.S. Armed Forces and diplomatic missions abroad for their own use; shipments between the United States and Puerto Rico, between the United States and its possessions (including the Virgin Islands), and between these outlying areas; exports from U.S. possessions; intransit shipments through the United States; transactions not considered to be of statistical importance, such as personal and household effects; temporary exports; low-valued or non-commercial exports by mail; and issued monetary coins of all component metals.

Inclusion of Gold in the Statistics.

As indicated above for imports, effective with the statistics for January 1978, exports of nonmonetary gold (in such forms as ore, scrap and base bullion, nonmonetary refined bullion, etc.) which were previously excluded, are included in the statistics. Exports of silver in these forms have been included since January 1969. Additional information regarding the inclusion of gold in the 1978 statistics appears in the November and December 1977 issues of Report FT 990.

Definition of Exports of Domestic and Foreign Merchandise

Exports of domestic merchandise include commodities which are grown, produced, or manufactured in the UnitedStates, and commodities of foreign origin which have been changed in the United States from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States. Exports of foreign merchandise consist of commodities of foreign origin which have entered the United States as imports and which, at the time of exportation, are in substantially the same condition as when imported.

Source of Export Information

The official U.S. export statistics are compiled by the Bureau of the Census primarily from copies of Shipper's Export Declarations which are required to be filed with Customs officials, except for Department of Defense Military Assistance Program Grant-Aid shipments which are reported directly to the Bureau of the Census by the Department of Defense and shipments by qualified exporters who have been authorized to submit data in the form of magnetic tape, punched cards, or monthly Shipper's Summary Export Declarations directly to the Bureau of the Census.

Export Valuation

F.a.s. Export Value.—The value reported in the export statistics generally is equivalent to a f.a.s. (free alongside ship) value at the U.S. port of export, based on the transaction price, including inland freight, insurance and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

Export Commodity Information

Beginning January 1978, export commodity information is collected in terms of the commodity classifications in the 1978 edition of Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States, which is based on the framework of the classification system in the Tariff Schedules of the United States (TSUS). In this report, the Schedule B data are rearranged and presented in terms of totals for the 1-digit commodity sections in Schedule E, which is based upon the Standard International Trade Classification (SITC), Revision 2, effective with the statistics for January 1978. Prior to January 1978, the export classifications in Schedule B were based upon the organizational framework of the former SITC, Revised.

Export Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of exportation. For purposes of the statistics, the month of exportation is generally based on the date when the shipment leaves the United States. (For vessel or air shipments it is the date when the carrier departs or is cleared from the port of export.) However, as indicated above for imports, because of

processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 2 to 3 percent (in terms of value) of the shipments from the actual month of exportation to a subsequent month, usually the succeeding month. These limitations should be borne in mind when making month-to-month comparisons.

Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in imports, exports, and similar series often reflect primarily irregular movements, differences in monthly carryover, etc.

Estimated Data for Export Shipments

The overall export and Schedule B section and division totals include sample estimates for shipments valued $251-$1,999 to Canada and for shipments valued $251-$999 to countries other than Canada. Data for shipments valued $250 and under to all countries are also estimated, based on established percentages of individual country totals, and included in the Schedule B Section 9 totals regardless of the commodity exported. It is estimated that the unadjusted overall total is subject to a sampling error of less than one-tenth of one percent, and the unadjusted Schedule B section or division totals are subject to sampling errors of about one percent. In addition, the Schedule B Section 9 total is subject to possible error in the estimated data for shipments valued $250 and under; and the overall total, and the individual totals for sections other than Section 9, to a more limited extent. Such $250 and under shipments represent about 1 percent of the total value of exports, and about 60 percent of the Schedule B Section 9 total.

SOURCES OF ERROR IN THE STATISTICS

Monthly import and export figures are subject to the possibility of errors which may arise from sources other than sampling errors, discussed above. Among these are errors in the reporting and/or processing of information as to commodity classification, value and other statistical factors, month of inclusion (see paragraphs on import and export carryover, above), and the undercounting of exports to Canada due to the non-receipt of Shipper's Export Declarations. For 1976, the undercounting amounted to about one and one-half billion dollars. In the case of imports the information as to value and commodity classification (as well as country of origin and net quantity) is verified by Customs officials on entries filed for transactions valued over $250 which are ordinarily subject to examination for Customs appraisement purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile both the import and export statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

MERCHANDISE TRADE BALANCES

Two trade balances are presented in this report:

1) The balance between exports based on f.a.s. values and imports based on f.a.s. values.

2) The balance between exports based on f.a.s. values and imports based on c.i.f. values with adjustments for imports from affiliated sellers abroad to reflect arms-length equivalent prices.

Both balances are useful for certain purposes. The first balance corresponds to a measurement of the international payments or credit flows resulting from merchandise trade between the U.S. and foreign countries. The second balance is based on concepts similar to those used by most foreign countries, and therefore provides a reference for comparison with the trade balances published by those countries.

REVISIONS TO THE STATISTICS

Under the revision policy adopted effective with the 1977 statistics, revisions to the monthly statistics for the current year will be issued only once a year, i.e., with the reports for June of the following year. Thus, revisions to 1977 statistics will be issued only in June 1978. Under the policy previously in effect, revisions were issued twice a year—the current year's June reports contained revisions for the prior year while the December reports usually contained revisions for the first three quarters of the current year.

In addition to the revisions which are made on a once a year basis, instances may occur where a significant error in the statistics for a month of the current year is discovered after the statistics for that month are compiled. If the error is of sufficient importance to require correction prior to the time that the regular revisions are carried, the correction is made and so noted in this report.

SOURCES OF FURTHER INFORMATION

Additional foreign trade statistics and information regarding coverage, valuation, sampling, and qualifications which should be considered by users of the statistics are contained primarily in the following publications: Report FT 990, Highlights of U.S. Export and Import Trade; FT 135, U.S. General Imports, Schedule A Commodity by Country; FT 410, U.S. Exports, Schedule E Commodity by Country; and the Guide to Foreign Trade Statistics. Information regarding additional sources of statistics, the methodology used in seasonally adjusting the data, and other matters relating to foreign trade statistics may be obtained from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

Table 1. U.S. Exports (f.a.s. Value Basis), General Imports (f.a.s. and c.i.f. Value Basis), and Merchandise Trade Balance, Adjusted for Seasonal and Working-Day Variation, by Month: January 1977 to September 1978

(In millions of dollars. See Explanation of Statistics for information on coverage, date of importation, definitions of export and import values and trade balances, and sources of error in the data)

[1] Export data represent domestic and foreign merchandise excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments. Import data represent general imports of merchandise.

[2] Beginning with the January 1978 issue of this report, export and import totals and trade balances include data on shipments of nonmonetary gold in the form of ores, concentrates, waste, scrap, and refined bullion. See "Explanation of Statistics" for additional information.

[3] Adjusted for seasonal and working-day variation using adjustment factors as described in footnote 1 at bottom of this page.

[1] Export and import statistical series are adjusted for seasonal and working-day variation but not for changes in price level. Factors used to adjust 1977 and 1978 data represent the combination of seasonal adjustment factors derived from monthly data through 1977 and the appropriate working-day factors. These factors were implemented for the adjustment of export data with the release of the January 1978 statistics, and for the adjustment of import data with the April 1978 statistics. In issues of this report for January through March 1978, the 1977 import data were adjusted by factors derived from monthly data through 1976. Interim factors, derived from monthly data through 1977, were used to adjust January-March 1978 import data.

[2] Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in exports, imports, and similar series often reflect primarily irregular movements, differences in monthly carryover, etc. Recent month-to-month percent changes in the overall seasonally adjusted export and import series are presented in the following table with average percent month-to-month rise and decline over longer periods shown for comparison. The average rise and average decline figures do not reflect data on nonmonetary gold. The averages also exclude percentage changes for (1) the period October-December 1977 because of abnormalities in the data due to effects of dock strikes and (2) periods when negligible changes (zero percent) in the level of exports/imports occurred. Percentage changes for f.a.s. and c.i.f. import values are not available for periods prior to January 1974:

Series	Month-to-month				Average monthly rates of change			
	Aug.-Sept. 1978 (Percent)	July-Aug. 1978 (Percent)	June-July 1978 (Percent)	May-June 1978 (Percent)	Average rise 1972-1977 (Percent)	Average decline 1972-1977 (Percent)	4 months May 1978-Sept. 1978 (Percent)	12 months Sept. 1977-Sept. 1978 (Percent)
F.a.s. export value..	+7.7	+5.7	-2.7	+3.2	+3.6	-3.4	+3.5	+2.0
F.a.s. import value..	+7.3	-4.7	+7.7	-1.9	(NA)	(NA)	+2.1	+1.5
C.i.f. import value..	+7.4	-4.6	+7.8	-1.9	(NA)	(NA)	+2.2	+1.6

[3] See the "Explanation of Statistics" for definitions of the export and import values and trade balances.

Table 2. U.S. Exports (f.a.s. Value Basis) of Merchandise Showing Department of Defense (DOD) Military Assistance Program Grant-Aid Shipments, by Month: January 1977 to September 1978

(In millions of dollars. See Explanation of Statistics for information on coverage, definition of f.a.s. export value, and sources of error in the data. Unadjusted totals represent sum of unrounded figures and hence may vary slightly from sum of rounded amounts)

Period	Exports excluding DOD Grant-Aid[1]			Exports including DOD Grant-Aid[1]		DOD Grant-Aid[2]		
	Domestic and foreign, seasonally adjusted[3]	Domestic and foreign, unadjusted	Domestic, unadjusted	Domestic and foreign, unadjusted	Domestic, unadjusted	Total	Western Europe	Other countries

[1]Beginning with January 1978 statistics, totals include data on shipments of nonmonetary gold. See "Explanation of Statistics" for additional information.

[2]Represents only export shipments from the United States and differs from DOD Military Assistance Program Grant-Aid shipment figures under this program as follows: (a) Transfers of the material procured outside the United States and transfers from DOD overseas stocks from export shipments. (b) Export value is f.a.s., whereas DOD value, in most instances, is f.o.b., point of origin. (c) Data for shipments reported by the DOD for a given month are included in Bureau of Census reports in the second month subsequent to the month reported by the DOD.

[3]Adjusted for seasonal and working-day variation. See footnote 1 on the bottom of page 5.

[4]Annual total is not shown for seasonally adjusted data. Unadjusted data should be used for annual totals.

Table 3. U.S. Imports of Merchandise, by Month: January 1977 to September 1978

(In millions of dollars. See Explanation of Statistics for information on coverage, date of importation, definitions of f.a.s. and c.i.f. import values, and sources of error in the data. Unadjusted totals represent sum of unrounded figures and hence may vary slightly from sum of rounded amounts)

Period	F.a.s. value[1]			C.i.f. value[1]		
	General imports		Imports for consumption, unadjusted	General imports		Imports for consumption, unadjusted
	Seasonally adjusted[2]	Unadjusted		Seasonally adjusted[2]	Unadjusted

[1]Schedule E section descriptions are as follows:

0. Food and live animals
1. Beverages and tobacco
2. Crude materials, inedible, except fuels
3. Mineral fuels, lubricants, and related material
4. Oils and fats--animal and vegetable
5. Chemicals and related product, n.s.p.f.
6. Manufactured goods classified chiefly by material
7. Machinery and transport equipment
8. Miscellaneous manufactured articles, n.s.p.f.
9. Commodities and transactions not classified elsewhere

[2]Beginning with January 1978 statistics, totals include data on shipments of nonmonetary gold. See the Explanation of Statistics for additional information.

[3]Adjusted for seasonal and working-day variation. See footnote 1 on the bottom of page 5. Annual totals are not showo for seasonally adjusted data. Unadjusted data should be used for annual totals. The section totals in this table and similar overall monthly totals in tables 1 and 2 were adjusted independently.

Table 5. U.S. General Imports (f.a.s. Value Basis) of Merchandise, Schedule A Sections, Seasonally Adjusted and Unadjusted, by Month: January 1977 to September 1978

(In millions of dollars. See Explanation of Statistics for information on coverage, date of importation, definition of f.a.s. import value, and sources of error in the data. Unadjusted totals represent sum of unrounded figures and hence may vary slightly from sum of rounded amounts)

[1]Schedule A section descriptions are as follows:

0. Food and live animals
1. Beverages and tobacco
2. Crude materials, inedible, except fuels
3. Mineral fuels, lubricants, and related material
4. Oils and fats--animal and vegetable
5. Chemicals and related products, n.s.p.f.
6. Manufactured goods classified chiefly by material
7. Machinery and transport equipment
8. Miscellaneous manufactured articles, n.s.p.f.
9. Commodities and transactions not classified elsewhere

[2]Beginning with January 1978 statistics, totals include data on shipments of nonmonetary gold. See the Explanation of Statistics for additional information.

[3]Adjusted for seasonal and working-day variation. Effective with May 1978 issue, revised factors used to adjust 1977 and 1978 data. See footnote 1 on botton of page 5. Annual totals are not shown for seasonally adjusted data. Unadjusted data should be used for annual totals. The section totals in this table and similar overall monthly totals in tables 1 and 3 were adjusted independently.

Table 6. U.S. General Imports (c.i.f. Value Basis) of Merchandise, Schedule A Sections, Seasonally Adjusted and Unadjusted, by Month: January 1977 to September 1978

(In millions of dollars. See Explanation of Statistics for information on coverage, date of importation, definition of c.i.f. import value, and sources of error in the data. Unadjusted totals represent sum of unrounded figures and hence may vary slightly from sum of rounded amounts)

[1]Schedule A section descriptions are as follows:

0. Food and live animals
1. Beverages and tobacco
2. Crude materials, inedible, except fuels
3. Mineral fuels, lubricants, and related material
4. Oils and fats--animal and vegetable
5. Chemicals and related products, n.s.p.f.
6. Manufactured goods classified chiefly by material
7. Machinery and transport equipment
8. Miscellaneous manufactured articles, n.s.p.f.
9. Commodities and transactions not classified elsewhere

[2]Beginning with January 1978 statistics, totals include data on shipments of nonmonetary gold. See the Explanation of Statistics for additional information.

[3]Adjusted for seasonal and working-day variation. Effective with May 1978 issue revised factors used to adjust 1977 and 1978 data. See footnote 1 on bottom of page 5. Annual totals are not shown for seasonally adjusted data. Unadjusted data should be used for annual totals. The adjusted section totals in this table and similar overall monthly totals in tables 1 and 3 were adjusted independently.

GENERAL IMPORTS OF PETROLEUM AND SELECTED PETROLEUM PRODUCTS INTO THE U.S. CUSTOMS AREA AND U.S. VIRGIN ISLANDS, UNADJUSTED

Monthly and cumulative-to-date data on general imports of petroleum and selected petroleum products into the U.S. Customs area and into the U.S. Virgin Islands for the period January 1977 through the current month are presented in the tables that follow. Tables 1-A and 1-B present imports into the U.S. Customs area and tables 2-A and 2-B present imports into the U.S. Virgin Islands. (It should be noted that imports into the Virgin Islands are excluded from the regularly compiled foreign trade statistics and, therefore, are excluded from the data presented in tables 1-A and 1-B as well as the other tables shown in the front of this report.—See "Explanation of Statistics".

Effective with January 1978 statistics, certain changes were made in the commodity classifications (Schedule A and TSUSA) covering petroleum products. These changes are reflected in the listing of classifications shown below. Data presented in tables 1-B and 2-B which follow have been revised to reflect all changes in classifications, effective January 1978.

Schedule A and TSUSA Commodity Numbers Used in Compiling the Petroleum Information Presented in This Report

Energy products

Schedule A No.	TSUSA No.
Crude petroleum and derivatives to be refined	
333.0020	475.0510
333.0040	475.1010
334.3041 pt.	475.6510
Crude petroleum	
333.0020	475.0510
333.0040	475.1010
Gasoline	
334.1500	475.2520, 475.2560
Jet fuel	
334.1205	475.2530 475.2550
Kerosene	
334.2000	475.3000
Distillate fuel oil	
334.3021	475.0525 475.0545
334.3041 pt.	475.1015 475.1025
Residual fuel oil	
334.4050	475.0535
334.4060	475.1035
Propane and butane gas	
341.0025	475.1525, 475.1535, 475.1545
Liquid derivatives of petroleum, n.e.s.	
334.5430 pt.	475.6530

Nonenergy products

Schedule A No.	TSUSA No.
Lubricating oils	
334.5410 pt.	475.4500
Lubricating greases	
334.5410 pt.	475.5500, 475.6000
Paraffin and other mineral waxes	
335.1225 pt.	494.2200
335.1245	494.2400
Asphalt	
335.4500	521.1100
Naphthas	
334.5420	475.3500
All other petroleum products (pitch of tar coke, non-liquid hydrocarbon mixtures, and calcined petroleum and coal coke not for fuel)	
335.3000 pt.	401.6200
334.5430 pt.	475.7000
598.5020 pt.	517.5120 517.5140

Table 1-A. Summary of U.S. General Imports of Petroleum and Selected Petroleum Products into the U.S. Customs Area, Unadjusted, by Month (f.a.s. Value Basis): 1978

(See "Explanation of Statistics" for information on coverage, date of importation, definition of the f.a.s. import value, and sources of error in the data. Totals represent sum of unrounded figures and hence may vary slightly from sum of rounded amounts)

Commodity description[1]	January-September	January	February	March	April	May	June	July	August	September	October	November	December

Asphalt	119	-	-	40	79	-	-	-	-	-			
All other petroleum products	-	-	-	-	-	-	-	-	-	-			

- Represents zero. Z Less than one half of unit of measurement shown.

[1]See page 11 for a list of the Schedule A and TSUSA (Tariff Schedules of the United States Annotated) commodities included in each line item.

[2]Includes motor fuels, n.e.s.

[3]Quantity data which are reported in either pounds, short tons, or long tons in the regular import statistics have been converted to barrels in this report on the basis of 300 pounds per barrel.

Table 2-B. Summary of Imports of Petroleum and Selected Petroleum Products into the U.S. Virgin Islands from Foreign Countries, Unadjusted, by Month (f.a.s. Value Basis): 1977

(See "Explanation of Statistics" for information on coverage, definition of the f.a.s. import value, and sources of error in the data. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts)

Commodity description[1]	January-December	January-September	January	February	March	April	May	June	July	August	September	October	November	December
	Net quantity (Thousands of barrels)													
Total petroleum and selected products.	203,496	152,180	13,409	21,815	20,451	18,397	14,679	17,003	6,505	28,919	11,002	24,019	21,705	5,592
Energy products	203,467	152,164	13,409	21,815	20,451	18,397	14,679	16,999	6,498	28,914	11,002	24,015	21,696	5,592
Crude petroleum and derivatives to be refined	203,467	152,164	13,409	21,815	20,451	18,397	14,679	16,999	6,498	28,914	11,002	24,015	21,696	5,592
